GENERAL GLASS INTERNATIONAL

At GGI,  
partnership  
means  
one thing:  
we are here  
to make  
your vision  
come true.

More than 100 years ago, we began our family's business by repairing broken windows in the tenements of the Lower East Side. For five generations since, we've grown by paying attention to the craft of our business and the needs of our customers.

INCORPORATED  
GLASS  
B's

So many  
ways to get  
creative  
with glass.

Investing  
in our future  
and yours.

More than 3,000 cases of glass in stock,  
ready to go.

Digitally printed, acid-etched, textured,  
patterned, back-painted, antiqued mirror,  
laminated, fire-rated, clear, low-iron and  
tinted float and more.

Sourcing locally and worldwide, glass comes  
from more than 10 countries and 20 factories,  
from Asia to Europe, and right here in Secaucus.

Curtainwall? Countertop? Cabinetry? Interior  
partitions? Wall cladding? Doors that let the  
light in? Shelving? Signs? Shower doors? Store-  
fronts? We've got it, and everything in between.

Year after year, we've put our resources into  
the people, products and technologies that  
make the most difference to our customers.

New: digital, direct-to-glass printer, CNC work  
center, computer integrated manufacturing  
controls, environmentally friendly water  
recycling system.

Results: more design options, less hassles,  
faster ordering, fewer mistakes.

Because innovation requires investment.

**Creative Brief:**

Give us your biggest idea,  
toughest challenge, or even  
a straightforward order.  
Together, we'll make it happen.

Cutting edge technologies and old-fashioned attention to detail come together over 100,000 square feet of factory floor, making the magic happen, 24/7, for each one of our customers.

# Design dreams do come true.

Illustration, photo, pattern, design or mural — we can print it on glass.

A rainbow of colors, tints, and tones, without fading, chipping, peeling or cracking, at 360 dpi.

Murals reproduced on a multi-story curtain wall? Shadows printed on multi-colored glass tiles? Your logo on a privacy partition? An art commission in a public space? Been there, done that, happy to take on the challenge.

#### Harlem Hospital

Historic murals in a celebrated hospital. A 12,000 square foot curtain wall. An audacious vision for a critical community resource. GGI used Alice, its digital, direct-to-glass printing technology, to bring it all to life for HOK and the Harlem Hospital.

 **alice**  
Direct to glass printing

Either we've  
already got  
it, or we'll  
help you  
get it.

Strategically placed warehouses, international contacts, exceptional logistics, complete transportation capability.

Mixed cases from all over the world on one truckload? A single fabricated lite shipped cross-country? We treat every order like it's our only order.

Timely delivery of most orders within 5 to 10 days.

If it's your problem, then it's our problem. We do whatever it takes to get you the glass you need when and where you need it.

Can-do  
thinking  
makes  
things  
happen.

Digital printing of 120 pieces of glass in just one week. A 20-foot pane flown in from Germany. Saturday delivery of 360" lites direct to a job site. For us, it's all in a day's work.

Extra shifts, new machinery, capital investments, creative sourcing, efficient processing, and continuous improvement are just the way we do business.

For five generations, we've been growing, changing, adapting and responding to the needs of demanding architects, designers, glazing contractors and fabricators – we love making dreams in glass come true.
