

PRODUCT**Low-Iron Satin Etched****GLASS TYPE**

Decorative

DESCRIPTION

Satin Etched looks dramatically different when applied to low-iron glass. The one-sided, extra-smooth finish looks even more dramatic and striking on the low-iron glass compared to the same thickness in clear, satin-etched glass. This glass is often used for high-end shower door and interior applications. The finish is consistent throughout the sheet and does not easily pick up fingerprints, cutting oils or cerium oxide. Light transmission: 1/4" - 89%

**TREATMENT****PACKING**

Heavy Case; Approximately 10-22 pieces per case depending upon thickness and size
