## **GGI to Exhibit for the First Time at HD Expo 2016**

*A vast collection of samples reflecting the wide range of applications and interior design trends on glass will be displayed.*

**Secaucus, NJ, April 18, 2016:** GGI, booth 31258, will exhibit at the Hospitality Design Expo & Conference in Las Vegas May 4-6, 2016 for the first time in the company's history. GGI, also known as General Glass International, is a fifth generation family business and a leading supplier and fabricator of decorative glass.

Visitors will enjoy a wide array of unique glass samples that include proprietary patterned glass, custom back painted glass and digitally printed glass. The samples reflect new and innovative applications and trends in interior glass design.

GGI's Alice®, the first and the longest operating digital ceramic glass printer in North America, has printed interior projects such as the shower enclosures of the [Envoy Hotel](#), the public art [MaStair](#), and dividers in [Newark Airport](#).

GGI's newly designed booth will also contain an interactive station where visitors can handle the glass and take a digital tour of projects completed with GGI fabricated glass.

Stephen Balik, Director of Architectural Sales said, "It is exciting to be exhibiting at HD Expo. GGI has a lot to offer interior designers and architects. With fabrication at the core of our experience, our digital ceramic printing capabilities are unmatched and GGI turns out top-quality glass results. Our customers' clients also benefit from the centuries worth of knowledge and know-how when it comes to glass."
